Basic AI Policies of CAC Group

Under the CAC Vision 2030, "Evolving into a corporate group that consistently makes a positive impact on society, with technologies and ideas," the CAC group conducts business activities with the aim of enabling people to exercise their diverse imaginative and creative abilities which are unique to humans through the provision of digital technologies. One of the digital technologies that we are promoting is AI (Artificial Intelligence) technology, which we are proposing as a core technology.

In response to the rapid development of AI technology, we have recently established the group's basic AI policy, which aims to create new value through the utilization of AI technology, while ensuring safety and coexistence with stakeholders.

The Group will continue to contribute to and fulfill its responsibilities to society through the provision of AI and services and the resolution of social issues, while placing emphasis on fairness, safety, and the security of users, aiming to be a trusted presence in society.

[Basic AI Policies of CAC Group]

1. AI Innovation through Co-Creation
2. Pursuit of Fairness
3. Improvement of Transparency
4. Ensuring Safety
5. Security and Privacy
6. Human Resource Development
7. Compliance with Laws and Regulations

[Basic AI Policies of CAC Group]

1. AI Innovation through Co-Creation

We will strive for mutual understanding through dialogue with various stakeholders in the development, operation, and utilization of AI. We will also continuously improve AI and promote innovation, keeping in mind the other policies described in this basic policy.

2. Pursuit of Fairness

To avoid unfair discrimination, bias, or a particular worldview incorporated and reinforced in the AI model through educating AI, we will pay attention to the quality of data for training and consider various settings.

3. Improvement of Transparency

We will ensure transparency in AI training and operational processes and strive to present the basis for AI decisions in a way that is easy for humans to understand.

4. Ensuring Safety

Our priority is to ensure safety so that AI does not cause unintended consequences and harm to humans.

5. Security and Privacy

To prevent unforeseen adverse effects in the use of AI, we will strive to ensure security and respect privacy, and provide AI that our customers can use with a sense of security.

6. Human Resource Development

We will contribute to the creation of a better society by fostering human resources who will promote the development, operation, and utilization of AI, and by having these human resources take charge of our business.

7. Compliance with Laws and Regulations

We will utilize AI in compliance with the laws and regulations of the countries and regions in which we operate.
